NZ Student Visa · available full-time Dec 2026 – Feb 2027 · eligible for a post-study open work visa from Feb 2027

PROFESSIONAL SUMMARY

Master of Computer Science student at Victoria University of Wellington (B+ or higher in every graded course) with 12+ years in IT at a US-headquartered manufacturer, promoted four times from Helpdesk Technician to IT Manager. I deliver software and infrastructure projects end to end, work closely with users, and automate what slows them down. Strong in SQL and databases, with Spark, AI and security coursework. Open to internships (full-time Dec 2026 – Feb 2027) and graduate roles.

TECHNICAL SKILLS

Databases	SQL Server · PostgreSQL · MySQL · Neo4j · SQL (joins, views, window functions) · Schema design
Programming & Data	Python · PySpark / Spark MLlib · PyTorch · VBA (advanced) · R · JavaScript
Infrastructure & DevOps	VMware / Hyper-V · Windows Server · Linux (RHEL) · Docker / Podman · Git / GitLab · Cisco / Fortinet
Delivery & Security	PMP · ITIL · Requirements & user training · Vendor management · Security+ · ISO 9001/14000

SELECTED PROJECTS

- **Beijing Housing Price Prediction — AIML427 Big Data (individual):** Distributed Spark MLlib pipeline on the ECS Hadoop/YARN cluster: cleaned 318K listings, engineered 45 features with a leakage-free design, and ran 16 scaling/PCA experiments. Test R^2 0.805; scaling cut training time 6.6×.
- **Graph Analytics & Anomaly Hunt in Neo4j — SWEN432 (99/100):** Cypher and Graph Data Science on a 6,583-node network; traced 62 anomalous closeness scores to their root cause with four independent checks, and found 101+ duplicate record groups.
- **BLE Sensor Network on Real Hardware — SWEN428 IoT:** Gateway, sensors and relay in C on RIOT OS/NimBLE, measured on the FIT IoT-LAB testbed: 100/100 discoveries under 100 ms (median 31 ms); response time cut from 193 ms to 99 ms.
- **Incident Investigation with ACH — CYBR471:** Weighed 21 EDR, Sysmon, firewall, WAF and CTI records with Analysis of Competing Hypotheses to judge how a server was breached; wrote a 200-word containment and notification brief.
- **Shop-Floor Barcode Automation — Flexfab:** Replaced handwritten production records with barcode scanning and error-proofed Excel/VBA: 4 h → 8 min per document, ~3,500 work-hours a year saved, 2 software copyrights.
- **Data Centre Renovation & UPS — Flexfab, Nov 2024 – Jan 2025:** Led a renovation to national Class C standard: consolidated server cabinets and integrated APC 15 kVA + Schneider UPS. Finished 2 months ahead of schedule; commended by the IT VP.

EDUCATION

Master of Computer Science — Victoria University of Wellington · Feb 2026 – Feb 2027 (expected)

- **Grades:** A- Big Data · B+ Database System Engineering · B+ Artificial Intelligence · B+ DevOps; Trimester 2 in progress: Advanced Database Design (99% so far), Current Topics in AI (98.6% so far), IoT, Cybersecurity Attack & Defence
- **Awards:** VUW Hackathon 2026 — team 2nd place · VuwCTF 2026 — 22nd of 123 teams (top 18%), 8/11 of team points

Bachelor of Engineering in Computer Network — South China Normal University

PROFESSIONAL EXPERIENCE

IT Manager — U.S. Flexfab Rubber Products (Dongguan) Co., Ltd. · Sep 2013 – Aug 2025
Sole IT lead for a 500+ user US-owned manufacturing site; promoted four times (Technician → Jr. Engineer → Mid Engineer → Supervisor → Manager).

- **Leadership & budget:** Directed all IT operations and cross-factory network architecture; cut annual IT operating costs by 15% through vendor strategy and resource planning.
- **Automation & reporting:** Built VBA automation that halved report processing; a barcode + Excel/VBA shop-floor system saves ~3,500 work-hours a year.
- **Stakeholders & vendors:** Translated business needs into technical solutions and explained them to non-technical staff, managers and US headquarters; selected and managed vendors.
- **Systems & virtualisation:** Maintained 350+ endpoints and 100+ printers; deployed VMware/Hyper-V (reliability +20%); managed MPLS/Aryaka/Okta lines and FortiVPN.
- **Security & compliance:** Enforced security policy aligned with ISO 9001/14000, reducing incidents by 30%; ran security training for 200+ employees (95% pass rate).
- **Network & wireless:** Designed multi-factory network topologies and enterprise wireless coverage (5,000+ sqm, Cisco Catalyst 9200 and Fortinet FortiAP) for 500+ staff.
- **Service & support:** Single point of contact for IT; remote support for the Shanghai office and travelling staff; onboarding instructor for new hires.
- **Communications:** Ran Polycom / Cisco RoomKit video conferencing and Siemens HiPath telephony; administered Cisco Jabber, Microsoft Teams and Lync accounts.

Circuit Board Technician — ASUS Computer (Shanghai) · Mar 2013 – Aug 2013

- Diagnosed and repaired network circuit boards (NICs, routers, switches) with a 98% success rate; developed post-repair QA tests.

Construction Technician — Sinopec Shengli, Shandong · Feb 2011 – Mar 2013

- Deployed and maintained petroleum engineering equipment on site; ranked 1st in annual safety evaluations.

CERTIFICATIONS

PMP · ITIL Foundation · CompTIA Security+ · Database Systems Engineer (Intermediate, China) · RHCSA (full score) · RHCE · MCSE · MCSA · CCNA

COMMUNITY

- **Zealandia — Te Māra a Tāne:** conservation volunteer, habitat restoration and protection of native species (2026 – present)
- **Victoria University of Wellington:** Study Buddy Programme; Kitea Impact Programme and Ako in Action
